Agustin Gaggero

Full-Stack Software Engineer

agusgaggero@gmail.com · 71 43 50 76 · agusgaggero.com · LinkedIn · GitHub

Summary

Full-Stack Software Engineer with production experience building and maintaining web platforms, APIs, integrations and mobile applications. Currently owning software across the stack at an EV charging company, with a focus on Laravel, PHP, React, TypeScript and modern web infrastructure.

Skills

- **Languages:** JavaScript | TypeScript | PHP | SQL | HTML | CSS
- **Backend:** Laravel | Eloquent | Filament | Livewire | Node.js | Express | MySQL | PostgreSQL
- **Frontend & Mobile:** React | Next.js | Astro | React Native | Expo | Tailwind CSS | Vite
- **APIs & Integrations:** REST APIs | OAuth2 | Webhooks | WooCommerce | Shopify
- **Testing & Quality:** PHPUnit | Playwright | Jest | Supertest | PHPStan | Swagger
- **Infrastructure:** Docker | GitHub Actions | Laravel Forge | DigitalOcean | Vercel

Experience

Full-Stack Developer — *Copenhagen, DK*
Nordic Charge — *May 2025 – Present*

- Maintain the Partner Portal, a multi-tenant EV charging operations platform (Laravel, Filament, MySQL) covering order pipelines, inventory, installer operations, returns and invoicing. Designed the domain model and Eloquent relationships behind serialized charger tracking and per-team data isolation.
- Designed and developed new functionality in our internal REST API, integrating Monta, Zaptec, EOSVolt and Shopify to automate operator transfers and synchronize EV charging data, with HMAC-verified webhook intake for automated order creation.
- Led the new company website in Astro, React, TypeScript and Tailwind CSS, deployed on Vercel with SEO-focused performance and transactional email flows.
- Designed and shipped a React Native / Expo installer app for iOS and Android, with QR and barcode scanning, real-time serial validation and a model-specific installation wizard.
- Designed and built a WooCommerce plugin bridging merchant stores to our Partner API, with OAuth2 token caching, queued order submission with retry and backoff, rate limiting and HPOS compatibility.
- Own deployment and quality workflow: staging branches auto-deployed through Forge to DigitalOcean, Playwright end-to-end coverage, and PHPUnit suites kept clean at PHPStan level 8.

WordPress Developer — *Remote*
Lumina Marketing — *Dec 2024 – Jun 2025*

- Built and maintained custom WordPress sites for clients, creating and modifying themes and plugins and integrating third-party tools.
- Optimized performance and delivered responsive designs across the agency's client portfolio.

Frontend Web Developer (Volunteer) — *Copenhagen, DK*
Nordic Blockchain Association — *Sep 2024 – Present*

- Design and build the official websites for the 2025 and 2026 Nordic Blockchain conferences in Webflow, with custom JavaScript for interactive elements, contributing to over €100,000 in ticket sales.
- Take the sites from layout and responsive design through SEO and ongoing updates across the conference cycle, working with the association's organising team.

Restaurant Manager *Copenhagen, DK*
Juju *Jan 2022 – Aug 2024*

- Led a high-pressure restaurant team while maintaining demanding service standards, contributing to Bib Gourmand recognition in 2023 and 2024 from Michelin and "Best Bistro" at Årets Ret 2023.

Projects

Gunna – AI Running Coach Source Code | Live Website

A training log that ingests Apple Watch and Garmin workouts and pairs them with an AI coach that sees your goal and full run history

- **Features:** `.fit` and CSV parsing into per-km splits, heart-rate zones and running-form metrics; Riegel-projected race times; streaming AI chat with summarized run context; scrypt password hashing with JWT sessions and per-user data scoping; automatic Google Drive import.
- **Technologies:** TypeScript | Next.js (App Router) | React | PostgreSQL | Tailwind CSS | Anthropic SDK | Recharts | Garmin FIT SDK | Google Drive API

Products Manager Software Source Code | Live Website

A robust application for managing products efficiently, combining a powerful backend with an intuitive frontend

- **Features:** CRUD operations, validation, logging, API documentation, and comprehensive testing.
- **Technologies:** TypeScript | React | Node.js | Express | PostgreSQL | Tailwind CSS | Sequelize | Swagger | Jest | Supertest

Personal Portfolio Website Source Code | Live Website

A statically generated portfolio and blog showcasing projects, with a focus on performance and modern animation

- **Features:** Bento-box one-page design, fully responsive. Multi-framework component islands, MDX blog with RSS and sitemap, scroll-driven and data-driven animations.
- **Technologies:** TypeScript | Astro 5 | Solid.js | Svelte 5 | UnoCSS | GSAP | Motion | D3.js | Lenis

Education

Digital House *Buenos Aires, AR*
Full-Stack Web Development *2021*

- Comprehensive training in modern web development, including React, JavaScript, CSS, SQL, and more.

U.T.N *Buenos Aires, AR*
Electronic Engineering *2017 – 2020*

- Three years of Electronic Engineering before transitioning to software development, providing a foundation in systems thinking, hardware and the technical constraints relevant to EV charging infrastructure.

Hobbies & Interests

Private Pilot: Licensed private pilot, drawn to aviation for the combination of technical systems, procedures and decision-making under pressure.

Marathon Runner: Finished the 2026 Copenhagen Marathon in 3:55, a goal set months out and trained for through bad weather and slow progress.
